**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments filed 09/11/06 have been fully considered but they are not persuasive.

The rejection to claims 40, 44, 48 and 71 have been maintained believing that the previous rejection to those claims is proper.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44-51, 54, 55 and 71 are rejected under 35 U.S.C. 102(b) as being anticipated by Doty US Patent 4,599,086

Doty discloses an elongated stem (12) having a height, a first end, a second end, a longitudinal axis and a flange (66, upper section) extending outward from the stem and a transverse stop element (66, lower end). An elongated driver shaft (32) extending generally along the axis and sized to extend outside of the intervertebral space. The shaft is capable of applying an external force to the implant to transmit an axial force (see Figs. 5 & 6).

Expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969).

Claims are being treated as product by process claims. In accordance with MPEP 2113, these claims are not limited to the manipulations of the recited steps, only the structure implied by the steps.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 40 is rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0179695 in view of Ray US Patent 6,042,582.

EP 0179695 discloses a distraction device (12) comprising an elongated stem (20) having a first end, second end, a longitudinal axis, a length along the axis, a flange projecting outward (15) and a transverse stop element (15, lower end). However, EP 0179695 does not disclose a plurality of ridges.

Ray teaches an implant comprising a plurality of ridges for the purpose of increasing the surface area contact with the end plates and to facilitate retention between adjacent vertebrae (see col. 8, lines 54-63).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the EP reference with the Ray reference in order to increase the surface area of the implant and to facilitate retention between adjacent vertebrae.

***Allowable Subject Matter***

Claims 15-23, 41-43, 52, 65 and 67 allowed.

Claim 54 and 55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
